

Mohammad Esawi

Computer Engineer

ABOUT ME :

Front-end developer with a solid foundation in modern web and software technologies, and basic experience in back-end development. Passionate about creating efficient, user-friendly applications, and continuously enhancing my skills in the ever-evolving tech landscape.

WORK EXPERIENCE :

Courses :

Completed multiple courses on platforms such as Udemy and freeCodeCamp .including tutorials from Elzero Web School and Net Ninja. Expanded programming knowledge through resources like W3Schools and GeeksforGeeks. Enhanced problem-solving skills through HackerRank and LeetCode.

Training:

Undergoing practical training at Knowledge Academy, where I have enhanced my front-end development skills and strengthened my understanding of problem-solving. Additionally, I have received university training at Udacity. Developed various projects.
